

Anish Dara

anish_dara@berkeley.edu | Berkeley, CA | (650)-532-3577

EDUCATION

University of California, Berkeley

May 2028

Data Science (B.A) & Computer Science (B.A)

Relevant Coursework: Calculus I, Calculus II, Linear Algebra & Differential Equations, Foundations of Data Science, Structure and Interpretation of Computer Programs, Discrete Mathematics and Probability Theory

WORK EXPERIENCE

California Golden Bears Football

Berkeley, CA

Data & Film Analysis Intern

March 2026 – Present

- Synthesized 1,200+ minutes of game film and PFF data to audit 80+ data points per play, identifying 15+ opponent offensive tendencies, directly informed daily practice schemes and strategy adjustments.
- Deciphering opponent situational play-calling tendencies using PFF's Situational Stats, auditing 400+ third-down and red-zone snaps to build predictive 'Tendency Maps' to improve pre-snap defensive checks.

Tennis Channel (Contract)

Los Angeles, CA

Business Analyst

January 2026 – Present

- Leading market expansion strategy for national tennis media brand, conducting geographic and demographic analysis to identify potential clubs and tennis facilities for targeted outreach and partnership development.
- Designing data-driven growth initiatives to increase viewership, including audience segmentation, club-level engagement modeling, and forward-looking expansion roadmaps to guide regional penetration strategy.

PuroPlate

Berkeley, CA

Software Engineering Intern

December 2025 – Present

- Architecting a scalable backend data model (relational schemas + aggregation matrices) to structure product ingredient data and algorithmically generate allergen-specific risk scores for consumer-facing dashboards
- Developing automated data ingestion pipelines using public datasets and third-party APIs to normalize ingredient metadata, support large-scale product onboarding, and enable real-time allergy-based filtering

Igneia Café (Contract)

Remote

Business Analyst

September 2025 – Present

- Conducting competitive landscape and consumer analysis across U.S., European, and Mexican coffee markets to design region-specific go-to-market, pricing, and distribution strategies with phased rollout roadmaps
- Building an integrated 2–3 year growth roadmap, including cross-border Mexico-U.S. expansion strategy, operational scaling considerations, and post-expo lead prioritization framework to guide execution

ZymoChem (Contract)

San Leandro, CA

Business Analyst

August 2025 – December 2025

- Quantified domestic and international γ -PGA trade flows, analyzed shipment data under HS code
- Drove targeted market research to prioritize, source, and contact 200+ high-value prospective clients
- Developed a quantitatively driven ranking of 100+ companies to support client targeting strategy

PROJECTS

Sports Analytics Database

September 2025 – December 2025

- Built full-stack web application from scratch, designing a FastAPI backend and frontend interface; ingested and structured 10,000+ player, game, and team records from external NFL database spanning 14 seasons
- Developed basic and advanced football analytics metrics, implementing 25+ metrics including custom performance ranking algorithm, net impact ratings, and situational statistics across all non-kicking positions

Quantitative Athlete Performance Predictive Model

October 2025 – Present

- Developed multi-factor regression model to project player performance across 15+ statistical categories, identify inefficiencies in player prop markets with a 5.2% ROI over 800+ tracked wagers.
- Engineered a situational volatility filter to account for lineup-dependent variance, forecast statistical output shifts following roster injuries; successfully neutralized market-skews in mid-major player derivatives.

SKILLS

Software: Python, NumPy, Pandas, Matplotlib, SQL, Scheme, Java, HTML, CSS, PowerPoint, Excel, QGIS

Language: Fluent in English, Telugu; Working knowledge of Spanish, Hindi

Professional Skills: Translating technical insights for non-technical audiences, data-driven decision making

Interests: Chess, Competitive Math/Probability, Tennis, Cooking, Baking, Financial Modeling, Sudoku, Cricket
